WORKING EXPERIENCE

Site Engineer at Greencon Resources Sdn. Bhd. (March 2022 - Present)

- ❖ Project: Sub-structure work for 4 Storey Factory Building (Intel Electronics Sdn. Bhd.) at Kawasan Perindustrian Bebas Cukai, Bayan Lepas, Pulau Pinang.
 - Coordinate with site team for site coordination work & daily monitoring site progress work.
 - Coordinate & carry out with main contractor & consultant representative for site inspection or any other matter related to site work (pre or final inspection).
 - Arrange machinery and material use especially for lifting work, excavation work, sheet piling work, strutting work & concreting work.
 - Assist Site QS for site verification work for claim.
 - Prepare daily, weekly & monthly report for daily progress at site.

Junior Engineer at UCM Construction Sdn. Bhd. (Sep 2021 – March 2022)

- ❖ Project: Construction of Sewerage Treatment Plant at Kota Setar, Kedah.
 - Coordinate with Subcontractor for site coordination work.
 - Coordinate with consultant representative for site inspection or any other matter related to site work.
 - Daily monitoring site progress work (follow up with subcontractor to deliver work).
 - Carry out inspection with Subcontractor & consultant (pre or final inspection).
 - Arrange machinery and material for subcontractor use especially for unloading delivery material & concreting work.
 - Assist Site QS for site verification work for subcontractors claim.
 - Open & close Request for Inspection (RFI).
 - Prepare by daily planning for subcontractors.
 - Prepare weekly report for daily progress at site & write daily site diary in JKR book.

Assistant Engineer at Forensic Structural Engineering Team (USM) (Aug 2021)

- ❖ Project: Standard Material Test for Assessment of Deterioration in Reinforced Concrete Structures of Block D Building, SMK Pulau Nyior, Jitra, Kedah
 - Conduct a covermeter survey, half-cell potential measurement, carbonation test & chloride test.
 - Analyse result and prepare report for submission to main contractor.

Internship at River Engineering and Urban Drainage Research Centre (Jul 2020 – Sep 2020)

- ❖ Project: KWASA Damansara Township Development.
 - Involved in preliminary design of earthwork, road & drainage (MBPJ area).
 - Produced detail drawing for Sungai Payung, Sungai Rumpit and Sungai Paku (MBPJ area).
 - Conducted site inspection work on the Ecological Drainage System (MBSA area).
- ❖ Project: Design Option of the Flood Mitigation Plan of Sungai Muda, Kedah.
 - Involved in river survey for continuation study.
 - Conducted sediment data collection & analyse the result.
- ❖ Project: Flood Mitigation and Drainage for Sungai Rambai Valley and its surroundings, Seberang Perai Tengah, Pulau Pinang.
 - Involved in river survey for feasibility study.
 - Conducted sediment data collection & analyse the result.

PERSONALITY

- I am proficient in spoken and written (English & Malay).
- I like to work as a team, but also can work independently if needed.
- A fast learner and take full responsibility of the work immediately and highly motivated person.
- I am committed to my job and effective in doing multiple tasks with minimum supervision.
